5 June

Consulting, Legal & others

hybrid

Expert discussion – primary questions:

- What are the main regulatory challenges you currently face in Uzbekistan?
- Which incentives do you need first and foremost?
- Would you be comfortable operating under English law within the Center, or would you expect a separate special legal regime?
- What would encourage you to migrate your operational flows into this zone?
- Which currency control restrictions slow your business down the most?
- Are the existing legal instruments sufficient to protect your investments and contracts?
- Which digital services or government services do you find missing from a single-window (one-stop-shop) interface?
- What visa and work-permit issues affect your ability to hire and retain talent?

Note for participants:

The questions above are a starting point, not a checklist. The session is an open discussion – additional topics, follow-ups and questions from participants are welcome. Anything we don't get to in that session may be picked up in follow-up.
