5-3-4 Ueno, Taito-ku, Tokyo

UZBEKISTAN UNLOCKED

Tokyo

We are pleased to invite you to the Uzbekistan Unlocked in Tokyo, organized by IT Park Uzbekistan in collaboration with key partners from Japan and members of the Uzbek tech ecosystem.

This event is designed for companies, investors, and system integrators interested in exploring Uzbekistan's rapidly growing startup and product-driven tech ecosystem, as well as identifying opportunities for product partnerships, reselling, and system integration in international markets, including Japan.

The Roadshow will highlight Uzbekistan's emergence as a source of globally scalable digital products, with increasing numbers of startups and IT companies building solutions across AI, fintech, and enterprise software. The event will also touch on selective outsourcing models to support product development and operational scaling.

Key topics include innovation ecosystems and global growth strategies, collaboration with product companies, go-to-market approaches, and the development of Uzbekistan's IT talent pool. Industry experts and policymakers will share insights on how Japanese companies can expand their solution portfolios, integrate external products, and build efficient cross-border operations.

Highlighting the active role of IT Park Uzbekistan in fostering global partnerships, the event provides a platform to connect Japanese companies with high-potential startups, product companies, and ecosystem partners, enabling co-creation, integration, and scalable business expansion.

The event will be especially valuable for business leaders, system integrators, innovation teams, investors, and companies exploring product sourcing, partnership opportunities, and entry into emerging markets.

We look forward to meeting you in Tokyo.

Please note: The session will be conducted in Japanese
Participation is free of charge
